

Demonstration/Model Project Directions

3rd & 4th Grade:

1. Read to learn about your topic. Look up your topic on the Internet with help from an adult. Read books about your topic. You may even ask a librarian for ideas on where to learn more about your topic. Write down a rough draft of five facts by March 27th.
2. Start creating your model. Work on it at school and at home and have it completed by April 12th, 2018
3. Create a display board, using a trifold, for the science fair; we will be working on them on April 3rd & April 10th, so make sure you have your trifolds at school!
4. Bring your model and display board to the school and be ready to show it off on April 12th, 2018

*** Mrs. Fagonde has 3 classes with the 3rd and 4th Grade and the students will be given time to work on this. The supplies and a trifold do need to be gathered and brought in so the they can work on them at school too. Feel free to contact Mrs. Fagonde via Facebook or by cell 263-8779, with any questions you may have.
